1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claim 10:

Line 32, "the pair" has been changed to --one of the pair--.

The changes have been made to clarify the signals at the first and second nodes representing one of the pair of oscillating signals recited in claim 7.

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest half adders, which receive the predetermined duty cycle signals from the duty buffers and generate a first output signal as a result of an Exclusive-OR operation on the output signals of the duty buffers and an output signal as a result of an AND operation on the predetermined duty cycle signals, and a switch, which selects one of the oscillating signals of the ring oscillators circuit, the XOR result and the AND result, according to a switch control signal as called for in claims 1, 7 and 13. Therefore, claims 1-15 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
